Computerized Advanced Marine Engineering
Loading

Passengers/Ro-Ro/Yachts

One screen covers the entire program

Standards functions for Multi purpose

- Hydrostatic information table(Draft,trim,LCB...)
- Intact Stability information table-IMO Criteria
- Weather Criteria information table
- Longitudinal Strength calculation table(S.F., B.M)
- Summary of cargoes information table
- Forward draft limit
- Calculation of Propeller immersion
- Load Line selection(Summer,Winter,Tropical...)
- Restrictions(Draft,Trim,S.F.,B.M., Air Draft)
- Automatic unit conversion(Metric-British)
- Water density calculation
- Actual loading graph of the vessel
- On line help and error/warning messages
- Explorer to manage loading conditions(copy, paste, recycle bin, directories....)
- Import-Export loading conditions
- Reporting facilities(Print out tables and graphs)

Optional utilities for Multi-purpose

- Ballast Water Management module;
- Display and printout Draft Survey Report;
- Auto-Trim module;
- Damage Stability Calculation – Direct damage assessments;
- Damage Stability Calculation- Automatic assessment for each loading condition using GM Curve with various trims in Damage condition;
- Grounding/ Refloating calculation
